

## OUTDOOR SPACES.

For entertaining. Summer dinners with the family. Just everyday living. They've become an essential and integral part of landscape design and installation in the twenty-first century. And for building outdoor spaces that truly integrate a home into its setting, nothing surpasses natural stone. Natural stone adds warmth and a sense of permanence to any outdoor room while complementing virtually any style of home.

The versatility of color and shapes in natural stone means that stone can be used for a wide range of structural elements; from patio surfaces and dry-stack walls to more elaborate turns such as bars, planters and firepits. And natural stone is the perfect complement to the water features that have become a prominent element of many modern landscapes.

SOUTH RIDING NURSERIES distributes a broad selection of stone products that help you create outdoor spaces that are beautiful as well as functional. This brochure highlights just a few of our more popular offerings. To learn more, please visit the sales yard or give us a call today.

## SOLD BY THE PALLET

### Pennsylvania Field Stone

*Thin, 1—2" • Standard, 1—4" • Thick, 4—12"*  
*Palletized; 3,200 to 3,500 lbs per pallet.*

This naturally occurring stone from Pennsylvania can vary in thickness as listed above. Pieces are generally from 6" to 16" across and frequently used for dry-stack walls due to their uniform flat and angular shapes. Color can vary by region but is generally in tones of grey. Reddish or lilac hues are available by special order.

### Colonial Wall Stone

This is a full-color bluestone primarily in shades of grey and blue. The uniformly thick irregular flat shapes work well in dry-stack walls and provide a linear look.

### Steppers

*Small,  
15-60 pieces  
per pallet •*

*Medium, 6-16 pieces per pallet •  
Large, 2-6 pieces per pallet*

Steppers can vary in size and shape by vendor and region. Small steppers are about the size of a loaf of bread and are palletized as 3 to 6 stacks with 6 to 10 stones per stack. Medium steppers are usually

2 stacks per pallet with 6 to 8 stones per stack, about 2" to 8" in width, and large steppers are single stacked 2½' to 4' wide and 6" to 12" in thickness. Steppers are generally flatter when compared to boulders and lend themselves to be used as stepping stones or stacked in retaining walls.

### Boulders

*Small, 20-40 pieces per pallet • Medium, 5-10 pieces per pallet • Large, 2-4 pieces per pallet • Extra Large, 1 piece per pallet*

Our Natural Boulders and Forest Stone vary in size, shape and color, from small 6" to 8" stones that are perfect for creek beds to large 5' x 5' slabs that can form the centerpiece of a waterfall. Typically boulders are rounder than steppers. Our Forest Stone is generally a smaller boulder similar in size to a basketball. Each is personally hand-selected from the mountains of West Virginia and Pennsylvania by our vendor, ensuring quality stone on every pallet.

### Irregular Standing Flagstone

*1", 1½" or 2" width  
Average pallet weight exceeds 3,500 lbs.*

This product is stacked vertically to give it its name. Pieces are uniform in thickness but vary in their asymmetrical shape, generally in larger size pieces from 24" to 54". It is commonly used for paving walkways and patios when a more natural look is desired over cut dimensional flagstone.

## SOLD BY THE PIECE

### Dimensional Flagstone

Full color range in 1" and 1½" thicknesses; sized in 6" increments from 12" x 12" up to 24" x 36". Thicker and larger sizes are also available; Select Bluestone and Thermal selections are available as special order items. Thermal flagstone is edge-sawn on four or six sides and heated/flamed on one face; giving tighter tolerances in all three dimensions that make installation easier. Select Bluestone is carefully chosen for its deep blue color uniformity across each piece and pallet. Full Color Range stone includes blues, greys, greens and browns in each piece and pallet along with much smaller intrusions of other complementary tones.

## BULK PRODUCT SOLD BY THE TON

### Chalet 1-3"

This round to oval decorative stone product comes in various sizes and color ranges. We stock the popular 1-3" size (golf ball up to baseball size) and color blend in hues of grey, blue, cream, tan and lilac. Chalet is commonly used as an accent mulch, dry creek bed, or decorative French drain. This select stone blend should not be confused with common river rock or pea gravel which is much more yellow and brown and lacks the unique color range that makes Chalet highly popular.

## DELIVERY TO YOUR JOB SITE

In addition to our two delivery trucks—one with dump capacity—SRN also has access to independent carriers that can deliver with Spyder or boom off-loading capabilities. Capacity of these trucks varies with configuration; please give us a call for details.
